**THIRD QUARTERLY RESULTS ANNOUNCEMENT  
FOR THE NINE MONTHS ENDED 30 JUNE 2006**

**Characteristics of the Growth Enterprise Market (the “GEM”) of The Stock Exchange of Hong Kong Limited (the “Stock Exchange”)**

The GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on the GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on the GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of the GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on the GEM, there is a risk that securities traded on the GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on the GEM.

The principal means of information dissemination on the GEM is publication on the Internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on the GEM-listed issuers.

*The Stock Exchange takes no responsibility for the contents of this announcement, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement.*

## **HIGHLIGHTS**

Turnover recorded approximately HK\$47.0 million for the Review Period.

Loss after tax amounted to approximately HK\$8.3 million for the Review Period.

No dividend was declared for the Review Period.

## **BUSINESS REVIEW AND PROSPECTS**

During the three months ended 30 June 2006 (the “Quarterly Period”) and the nine months ended 30 June 2006 (the “Review Period”), the turnover of IIN International Limited (the “Company”) together with its subsidiaries (the “Group”) increased by 250% and decreased by 10% respectively as compared to that of the corresponding periods of last year. The significant increase in turnover during the Quarterly Period was due to the fact that the transmission segment had secured some substantial contracts. The turnover during the Review Period was mainly contributed from the transmission business of the Group, which represented approximately 99% of the turnover of the Group.

During the Review Period, the Group’s was committed to carrying out research and development of radio frequency identification (“RFID”) technology and relevant projects, especially applying in logistics management solutions. In order to streamline the implementation of the relevant projects, the Group has formed a liaison group with its strategic cooperative partners. Through designating more resources in a focal and in-depth manner, the Group intends to substantially develop the RFID technology and relevant projects and logistics management solutions. Under the effort of the liaison group, we have made satisfactory progress in the relevant projects.

As the Group has reduced the proportion of sales of some core businesses, whereas, new businesses are pending for implementation, the Group has adopted stringent cost control measures during the Review Period, with an aim to achieve effective use of operating resources and cost reduction.

The Group expects that the transmission business will still be the main business in short term, and expects that the breakthrough in new businesses could bring contribution in businesses and provide a growth point for the turnover of the Group.

## FINANCIAL REVIEW

The Group's turnover during the Review Period dropped approximately 10% to approximately HK\$47.0 million compared to approximately HK\$52.0 million for the corresponding period of last year. The decrease in turnover was mainly due to the Group's gradual fading out of the network infrastructure solutions segment.

During the Review Period, turnover contributed from transmission segment, amounting to approximately HK\$46.7 million, which represented approximately 99% of the Group's turnover (corresponding period last year: approximately HK\$21.7 million, representing approximately 42% of the Group's turnover). As the Group's existing business was mainly generated from the transmission segment with lower gross profit margin, the gross profit margin of the Group for the Review Period was approximately 16% as compared to that of the corresponding period last year of approximately 19%.

During the Review Period, the Group's net loss attributable to equity holders of the Company was substantially narrowed down to approximately HK\$8.9 million as compared to approximately HK\$20.9 million for the corresponding period of last year. It was mainly due to the Group's further implementation of cost control measures and the significant decrease in provision of intangible assets for the Review Period.

Selling and distribution costs of the Group for the Review Period amounted to approximately HK\$4.3 million which was basically at the same level of that of the corresponding period last year. During the Review Period, selling and distribution costs could not be further reduced due to the need of developing new businesses.

Administrative expenses of the Group for the Review Period decreased by approximately 46% to approximately HK\$9.7 million from approximately HK\$18.2 million for the corresponding period of last year. The decrease in administrative expenses was mainly attributable to the Group's continuing effort in cost control and reduction in the scope of operations.
